Walther pps m2 manual safety for sale uk ebay

Archived from the original on 2014-06-08. Tritium illuminated night sights are also available. Often imitated, but never duplicated, the PPS series is designed to exceed every expectation and deliver the absolute best shooting experience possible. ^ a b Kasler, 137[dead link] ^ Kokalis, 321[dead link] ^ Safety & Instruction Manual WALTHER PPS Pistol on the USA Walther website Archived 2009-06-11 at the Wayback Machine ^ "Walther Defense Accessories". The magazines are made of steel for Walther by the Italian subcontractor MEC-GAR and have an anti friction coating for easy loading and anti-corrosion and witness holes to view how many rounds are in the magazine. Waltherarms.com. For this Walther offers front sight elements in four differing heights. Walther does however offer a magazine disconnect as an optional safety on some PPS pistols that will prevent discharging the pistol without a magazine present in the pistol.[7] Empty magazines are released by depressing ambidextrous magazine release levers incorporated into the trigger guard.[4] Sights The standard low profile iron sights are made of steel. Unlike many other trigger systems preset internal strikers have a let-off point and trigger pull that remains unchanged from the first shot to the last and requires no decocker.[4] Ergonomics were a key focus in the design of the firearm, and as a result, three interchangeable grip backstraps are included (small, medium and large) to accommodate various hand shapes and sizes; this feature permits most shooters a comfortable and efficient grip on the firearm The injection molded grip frame contains 4 steel guide rails for the slide: two at the rear of the frame, and the remaining pair above the front of the trigger guard. The magazines are available in 6, 7 and 8 round capacity in 9×19mm Parabellum and 5, 6 and 7 round capacity in .40 S&W. The 'QuickSafe' trigger variant main difference with the Walther P99 Quick Action trigger is that removing the PPS pistol's backstrap will disable the gun for safe storage by decocking and blocking the striker until the backstrap is reinstalled. Dimensionally the M2 series are similar to the original PPS variants. Upon its release, the PPS series transformed the industry by introducing a polymer single-stack concealed carry pistol, effectively establishing a trend that remains popular still today. ^ PPS Semiautomatic Pistol at en.abrykabroni.pl Archived 2010-02-04 at the Wayback Machine ^ a b c d e f g "Safety & Instruction Manual WALTHER PPS Pistol on the official German Walther (multilingual)" (PDF). When the trigger is pulled, the already partially cocked striker is fully cocked and released, firing the pistol. The thin, yet comfortably full frame provides the most grip surface in its class, allowing ample room for off-hand support. More grip surface provides significantly improved recoil management when combined with the higher grip supplied by the undercut trigger guard. According to Walther, "Plus-P" (+P) overpressure ammunition may affect the wear characteristics of the PPS pistol or exceed the margin of safety. Previously another was available in 9 mm which had "First Edition" printed on the slide and a blue-tinted frame (part number WAWAP10003FC). The PPS M2 is also available in an LE edition with phosphoric iron sights. By looking into this opening the user can see if a cartridge is present in the chamber.[4] Feeding The PPS feeds from single stack magazines of varying capacity. The sight radius is 137 mm (5.4 in).[1][4] Overpressure ammunition German definitive smokeless powder proof marks (eagle over N figure) issued by the Beschussamt Ulm C.I.P.-accredited Proof House (antlers figure) on a Walther PPS pistol. These features make the PPS M2 the most accurate, controllable, and concealable handgun available on the market. ^ "PPS M2 - www.waltherarms.com www.waltherarms.com". Features The pre-loaded internal striker is a variant of the partially cocked striker system of the Walther P99 Quick Action model. 2019-03-25. Archived from the original on 2019-07-05. It is available in either 9×19mm Parabellum or .40 S&W chamberings. After the last cartridge has been fired, the magazine follower exerts upward pressure on the slide stop causing it to engage the slide stop notch thereby holding it in the "open" position.[4] The slide stop release lever is located on the left side of the frame directly beneath the slide and can be manipulated by the thumb of the shooting hand for right handed shooters. It was first shown in 2007 at the IWA & OutdoorClassics and is a slim polymer framed weapon of similar size to the Walther PPK pistol. This is a reminder to check your serial number against this list and verify that you have had the recall service completed on your PPS M2 pistol. The standard PPS magazines weigh 43 g (1.5 oz) (6/5 rounds of 9×19mm Parabellum/.40 S&W), 59 g (2.1 oz) (7/6 rounds of 9×19mm Parabellum/.40 S&W) and 67 g (2.4 oz) (8/7 rounds of 9×19mm Parabellum/.40 S&W). Archived (PDF) from the original on 2012-01-12. The extended +1 and +2 floorplates integrate with the gripframe adding finger rest space for better grip. This marking on the ammunition designates that it exceeds established industry standards, but the designation does not represent defined pressure limits and therefore such ammunition may vary significantly as to the pressures generated.[4] Accessories Factory accessories include: fixed metal three-dot iron sights, fixed tritium night sights, adjustable sports iron sights, adjustable optic fibre iron sights, laser pointers, tactical lights, magazine flashlight adapters, holsters, magazines, and magazine loaders are offered as factory accessories.[8] Variants Currently four PPS models are available for purchase in the United States. > CLICK HERE TO VERIFY YOUR PPS M2 SERIAL NUMBER < MODEL: CALIBER: BARREL LENGTH: TRIGGER PULL: TRIGGER TRAVEL: CAPACITY: OVERALL LENGTH: HEIGHT: SAFETY: WIDTH: WEIGHT EMPTY: 2805961 9MM 3.2" 6.1 LBS 0.2" 6/7/8 RDS 6.3" 4.4" 3 AUTO 1" 19.4 OZ WATCH VIDEOSBUY NOWREVIEWSARTICLESMANUALWATCH VIDEOS WARNING: CALIFORNIA PROP 65 Not to be confused with Walther PP Super. The PPS is however technically much more based on the Walther P99 pistol.[1] PPS pistols manufactured by Walther in Ulm, Germany are imported to the United States through Walther Arms.[2] The PPS pistols are also made under license in Poland by Fabryka Broni Radom.[3] Design details Operating mechanism The Walther PPS is a short recoil-operated locked breech semi-automatic pistol that uses a modified Browning cam-lock system adapted from the Hi-Power pistol. The PPS M1 pistol has a traditional barrel with conventional (spiral grooves and lands) rifling, and PPS M2 has polygonal rifling. Under the dust cover the grip frame has an integrated mounting MIL-STD-1913 (Picatinny) rail for attaching accessories, such as a tactical light or laser pointer.[4] The chamber and other metal parts of the pistol are Tenifer treated (a ferritic nitrocarburizing process also used on Glock pistols). ^NOTE: REMINDER: PPS M2 RECALL On November 16, 2018 we issued a recall on PPS M2's with specific serial numbers. An indicator on the back of the slide shows if the striker is partially cocked. Safety & Instruction Manual WALTHER PPS Pistol on the USA Walther website Retrieved from " Two are chambered in 9×19mm Parabellum with part number WAP10001 for the standard model and part number WAP10006 for the Massachusetts compliant model and two in .40 S&W with the part number WAP10002 and part number WAP10007 for the Massachusetts compliant model. A steel spring drives a plastic follower. Retrieved 2016-01-28. Due to product evolution in the Walther pistol line the PPS maintains compatibility with Walther P99 sights. The Tenifer finish is between 0.04 mm (0.002 in) and 0.05 mm (0.002 in) in thickness, and is characterized by extreme resistance to wear and corrosion; it penetrates the metal, and treated parts have similar properties even below the surface to a certain depth.[5] The Tenifer process produces a matte gray-colored, non-glare surface with a 64 Rockwell C hardness rating (by comparison, an industrial diamond has a rating of 70 HRC) and a 99% resistance to salt water corrosion (which meets or exceeds stainless steel specifications),[6] making the PPS particularly suitable for individuals carrying the pistol concealed as the highly chloride-resistant finish allows the pistol to better endure the effects of perspiration.[5] PPS pistols are delivered in a polymer pistol case containing; the pistol, 2 backstraps of different sizes, 2 magazine (small and medium), magazine loader, instruction manual, warranty papers, factory test target showing 5 shots fired at 15 m (16 yd) distance and an envelope with the case of the proof round fired during the proof test at the C.I.P. accredited Beschussamt Ulm (Proof House Ulm).[1] Barrel PPS made under licence in Poland by Fabryka Broni Radom. 2018-11-16. Use of "Plus-P" ammunition may, according to Walther, result in the need for more frequent service. The pistol has a loaded chamber indicator in the form of a witness opening at the top of the slide/ejection port. It can be broken down into its main parts or field stripped with a take down catch without the help of tools. When a cartridge is present in the chamber the pistol can be fired without the need of having a magazine inserted in the weapon. ^ "PPS M2". Sources Walther PPS at Armoury-Online.ru Walther PPS at Modern Firearms External links Wikimedia Commons has media related to Walther PPS. The PPS M2 has a trigger travel of approximately 6 mm (0.2 in) and a trigger pull of approximately 27 N (6.1 lb). Archived from the original (PDF) on 2018-07-21. U.S. models are currently sold in plastic hard cases with both backstraps and a two magazines (7 and 8 round capacity in 9mm, 6 and 7 round capacity in .40 S&W).[9] M2 series In 2016 the PPS M2 chambered in 9×19mm Parabellum was introduced, and as of 2018, it has never been available in any other caliber.[10] The PPS M2 general ergonomic design shares similarities with the Walther PPO M2 series. Early PPS pistols can be modified but need an enlargement of a hole in the pistol gripframe before the new style slide stop and spring can be installed. Safety The PPS features three safeties (trigger safety, internal firing pin safety and QuickSafe feature) of which the external integrated trigger safety inner lever mechanism contained within the trigger serves as an additional passive drop safety. The PPS has a trigger travel of approximately 6 mm (0.2 in) and a trigger pull of approximately 27 N (6.1 lb). The various magazine capacities are achieved by small, medium (+1) or large (+2) magazine floorplates. The PPS M2 features a push button magazine release, front and rear slide serrations and a redesigned grip. Archived from the original on 2009-08-04. The PPS has a glassfiber-reinforced polymer frame and steel slide assembly. Archived from the original on 2016-01-27. www.galleryofguns.com. The secret to the accuracy of the PPS M2 results from the legendary Walther barrel and an internal steel chassis that provides superior slide-to-frame fit. ^ "Gun Genie - Davidson's most popular and powerful search engine to find and buy guns at galleryofguns.com". Additionally, the PPS M2 magazines are not compatible with the original PPS magazines.[11] The integrated mounting MIL-STD-1913 (Picatinny) rail for attaching accessories, such as a tactical light or laser pointer found on the PPS M2. The polymer grip has a non-slip surface on the sides and both the front and rear straps and a slightly funneled magazine well to aid magazine insertion. For this the pistol has to be sent in to the Walther customer service. The rear sighting element is adjustable for windage by drifting and the front sighting element can be adjusted for elevation by exchanging the front sight. Retrieved 2021-11-26. Retrieved 2011-11-26. A revolutionary yet practical concept. The standard sights have 3 high-contrast dots which serve as contrast enhancements and have been painted with afterglow paint to aid target acquisition under unfavourable lighting conditions. Delivering the premier concealed carry option with unprecedented accuracy and comfortability, capable of withstanding anything thrown in its way. Slide stop modification Walther modified the slide stop lever and an accompanying spring on the PPS pistols to improve reliability. The PPS M2 is a more refined version of that original design, now measuring only 1" thick! It is the ultimate representation of Walther's world-renowned performance catered to the expectations of the modern shooter. References ^ a b "Walther Defense Catalog 2011" (PDF). The small magazine is flush with grip bottom. ^ "Walther Arms - www.waltherarms.com". Walther recommends against the use of "Plus-P-Plus" (+P+) overpressure ammunition in Walther firearms. THE SINGLE-STACK THAT STARTED IT ALL.
